Welcome to all of the new students at Mian School. These students are Ashley, Joel and Marcus. Our Literacy and numeracy programs are now being used by all junior students in their classrooms. Our follow up data will be collected in term 4 and we hope to see some great improvements.

Thank you to all the families, friends and people from the Mian school community who attended our Biggest Morning Tea event. We had over 60 people attend and the food prepared by the students and staff was the best ever. Congratulations to Mrs Emily Harrison for all of her hard work and organisation for this event. We are all looking forward to recording the video that goes with the Rap that students have written together with Desert Pea Productions. Thanks to Apollo House for their support in putting this program in place for us. The students are very excited.

Lots of events are planned for next term so be on the lookout for invitations. The Mian Winter Hot Breakfast Program has proved to be very popular. The students are enjoying a hot breakfast before going to class on these cold winter mornings. We hope to invite parents next term to join us.

Mrs Graves Report

Well done to year 10 for making such an effort this semester. Students are actively involved in completing tasks sent from Distance Education.

In English students have been working on a novel study for “Holes”. They have been involved in writing a sequel to the novel.

Coastal environments have been the focus in Geography and in Australian History all students have been given the opportunity to learn about the stolen generation.

In PD/H our class has been focused on the consequences associated with risky behaviours. Ethan and Alex have developed a well thought out information report about STI’s during this unit.

Jack and Jesse are both making excellent progress in Science and Maths course work.

Mr See’s Report

This term we have worked on Ancient Egypt and India. The students produced a display in class, that consisted of food that was consumed in Ancient Egypt at the time. Some examples were dried figs, dried dates, dried fish, yoghurt and hummus. The students really enjoyed this experience.

Science has been fun working on the solar system, each student selected a planet that they researched. They are in the process of constructing their planet to produce a solar system model.

The class participated in the Biggest Morning Tea. The whole class made slices winning the most entries. Every student in our class won a prize.

We are utilizing the newly developed literacy and numeracy resource boxes, which are reinforcing the concepts of maths and literacy that individual students require.

Ready for the taste testing of our Egyptian Food

Girls using concrete material from our numeracy resource box

Ethan and the python!!!
Mr Wettons' Report

Class 2 has had an interesting start to term 2 this year with the arrivals of new students Joel and Marcus, things are only getting better! Tyrell, Phemise and Jacob have been hard at work with the new literacy and numeracy programs that have been implemented into the classroom and we are seeing fantastic results from all students in these areas!

Tyrell and Jacob have given an excellent effort in English this term making improvements in their reading, spelling and comprehension skills.

Tyrell was awarded sportsperson of the semester this term at our biggest morning tea. What a great honour for a brilliant student! Keep up the great work Tyrell!

In mathematics Phemise has been putting in a good effort and understanding a variety of concepts in Maths. He has set excellent times in the speed tests and is answering a majority of the questions correctly.

In history this term we have been looking at Australians at War, the conflicts Australians has been involved in and the sacrifices made by the people of Australia. Tyrell, Phemise and Jacob have both shown great interest in this topic and have also looked at more recent conflicts Australia has been involved in and the people that have won the Victoria Cross.

Science has been a lot of fun this term, looking at reactions of different chemicals and how sound waves travel. The boys made and tried to launch a bottle rocket, unfortunately it didn't go so well. Never mind, we will continue to try it until we succeed! We have also looked at how sound waves travel. We did this by making cup phones and conducting an experiment and seeing how effectively they travelled at different lengths.

It has been a fantastic term and we are all excited to see what next term brings! Keep up the good work Class 2!

Mr Sayers' Report

Classroom 4 has had an exciting term. The boys have been working hard with their new literacy and numeracy program and have been developing their culinary skills during our Friday Fun sessions.

English has been positive this term with the class working on reading, writing and comprehension skills. The boys have been concentrating and showing improvements by using a variety of strategies to work out challenging tasks.

The class has been looking at Rainforests in Geography. Kyle impressively demonstrated his knowledge of Australian rainforests when he accurately labelled the Daintree Rainforest in North Queensland without the aid of an atlas or map.

Classroom 4 Friday Fun

The boys should be proud of their efforts this term, I am looking forward to seeing more talents next term. Well done!
PBL is going strong at Mian School. Students look forward to the daily PBL raffle and spend the day gaining points so they have the best chance to win the Prize. Next semester we will be reviewing some of our PBL lessons.

Check out our new digital PBL symbols. We are very impressed with them!!!
